

Arvind Patil

DevOps/SRE Engineer

Pune, India | +91 7507382269 | patilarvind610@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

DevOps/SRE Engineer with 3.5+ years of experience in Telecom application support, cloud infrastructure, and CI/CD automation. Hands-on experience with AWS, Linux, Docker, Kubernetes, Terraform, Ansible, Jenkins, GitLab, GitHub Actions, and Python. Skilled in building and maintaining CI/CD pipelines, infrastructure automation, containerized deployments, monitoring, and production support. Experienced in troubleshooting incidents, performing root cause analysis, and collaborating with cross-functional teams to ensure high availability and reliable service delivery. Passionate about cloud native technologies, automation, and DevOps best practices.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, VPC, IAM, EKS, ECS, RDS, Route53, CloudWatch, ELB, Auto Scaling)

IaC & Config: Terraform (Modules, Remote State, DynamoDB Lock), Ansible (Playbooks, Roles, Handlers, AWX)

CI/CD & Build: Jenkins (Declarative & Scripted Pipelines, Master-Slave), AWS CodePipeline, GitHub Action, GitLab

Containers: Docker (Multi-stage Builds, Compose, Volume, Networking), Kubernetes/EKS/ECS, Helm Charts, PV/PVC, ConfigMaps, Secrets, OpenShift

Monitoring & Observability: Prometheus, Grafana, Dynatrace, AWS CloudWatch, Alert/Bug Management, Cluster Health Checks

Scripting & VCS: Shell Scripting (Bash), Python (Basic), YAML, JSON, Groovy, Git/GitHub/GitLab (GitFlow, Hooks, Rebase, Cherry-Pick)

OS & Security: Linux (RHEL 7/8, Ubuntu), AWS IAM, Security Groups, Network ACLs (NACLs), SSH, Windows.

Collaboration Tools: Jira, Confluence, MS Teams, Salesforce.

Methodologies: Agile Scrum, SDLC

WORK EXPERIENCE

DevOps/SRE Engineer | Infosys Limited

Nov 2022 - Present

- **Project: Telecom Cloud Infrastructure, DevOps Automation & Site Reliability Engineering**
- Administered Linux servers across production and non-production environments, maintaining **99.9%+** uptime for mission critical Telecom applications.
- Investigated production incidents using system logs and metrics, performed root cause analysis (RCA), and resolved issues within defined SLA windows, reducing MTTR by **40%**.
- Managed Kubernetes deployments on Amazon EKS (Deployments, Services, ConfigMaps, Secrets, health checks, Persistent Volumes, rolling updates) for stable production releases.
- Implemented end-to-end CI/CD pipelines using Jenkins and GitLab CI/CD, automating build, test, and deployment workflows and reducing manual deployment effort by **50%**.
- Managed and provisioned AWS infrastructure including EC2, IAM, VPC, S3, ELB, Auto Scaling, Route 53, and CloudWatch, supporting scalable and highly available Telecom application environments.
- Built optimized Docker images using multi-stage Dockerfiles and managed multi-container applications using Docker Compose, reducing image size by **65%** and pipeline execution time by **40%**.
- Managed configuration across 6500+ Linux servers using Ansible Playbooks, Roles, and Handlers, ensuring consistent server setups.
- Scheduled and automated maintenance activities, server configuration, and application deployments using AWX (Ansible Automation Platform), utilizing playbooks, inventories, credentials, and job templates while coordinating Dynatrace maintenance windows to suppress alerts during planned changes and minimize operational disruptions.
- Provisioned cloud infrastructure using Terraform following Infrastructure as Code (IaC) principles, reducing provisioning time by **60%**.
- Effectively co-ordinate with various functions development, testing, environment management, helpdesk within the organization throughout the **SDLC**.
- Monitored infrastructure, applications, and Kubernetes workloads using dashboards, metrics, logs, and alerts to ensure system availability and performance.
- Followed best practices to automate the release automation and worked in production releases and coordination with different stakeholders in entire release.
- Triggered and monitored OpenShift patching and deployment activities through GitLab CI/CD pipelines.

CERTIFICATIONS

- Python For DevOps [AI Edition]
- Infosys Certified AWS Cloud Practitioner
- Dynatrace Essentials | Dynatrace | 2026
- Certified DevOps Engineer Associate - TrainWithShubham

EDUCATION

Bachelor of Technology (B. Tech)

Electronics and Telecommunication Engineering- RCPIT, Shirpur

CGPA: 8.40/ 10
